

The issue prevents the application from charging the user the correct amount of euro for the pre-ordered food.

The screenshot shows a Jira issue page for ticket QC-7480. At the top, there's a navigation bar with icons for back, home, search, and a '+ Create' button. Below the header, the ticket ID 'QC-7480' is displayed next to a red bug icon. The main title of the issue is "[Dinner] The total of selected menu is calculated wrongly." To the right of the title are three action buttons: "To Do" with a dropdown arrow, a lightning bolt icon representing speed or priority, and "Improve Bug".

Key details:

- Description:** STR
 1. Open the Dinner Application
 2. Go to the “Location” and select Office No1
 3. Go to “Order For “field and select Thursday
 4. Tick on all the options in the food menu
 5. Observe the total displayed under the menu
 6. Repeat the steps 3-5 for every “Location”

The the total of order for Thursday in each Location (canteen) is calculated wrongly. While the correct total should be 25,2 euro for all the selected options the system calculate the total 22,2euro.
- Environment:** Google Chrome, Windows 11, Laptop
- Expected result:** The system should calculate the total of orders

Details sidebar:

- Assignee:** Petra Lasri Paprancova (indicated by a red circle with 'PP')
- Reporter:** Petra Lasri Paprancova (indicated by a red circle with 'PP')
- Labels:** None
- Due date:** None
- Severity:** Blocker (highlighted in a grey box)
- Priority:** Highest (indicated by two red chevrons)

At the bottom left, there are tabs for "Development" and "More fields". A small circular logo with colorful geometric shapes is visible at the bottom right corner of the interface.
